- ... and see more in my github account

#### Mobile App (React Native)

- Football Score
- To Do List
- Tubi Tv

# WORK EXPERIENCES

# Nova X (Frontend Developer - Freelance)

2022 - Present

I am a frontend developer at novaX, skilled in collaborating with UI/UX designers and backend developers. Proficient in Git and GitHub for version control, I excel in frontend management, ensuring clean and efficient code.

# BeyondsLimit Technology (MERN Stack Developer - Full Time)

2023 August - 2023 October

As a Junior Software Developer at Beyondslimit Technology, I worked with the MERN Stack, which involves MongoDB, Express, React, and Node.js. During my time there, I gained valuable knowledge in UI/UX principles, realworld project experience, understanding business flows and models, design patterns, and writing clean code. Collaborating with senior developers, I also had the opportunity to learn new technology stacks.

# MY SELECTION PROJECTS

# The Cappa Luxury Hotel (Frontend Team Project)

- Tech Stacks: We utilized React JS, Tailwind CSS, and Framer Motion to craft a dynamic and responsive web application.
- Ul Inspiration: Our project drew inspiration from the latest UI trends, resulting in a visually captivating user . experience.
- Workshop Project: This project was part of a workshop, offering a hands-on learning experience and practical application of skills.
- Team Leadership: As the team leader, I guided our team to success, ensuring the project exceeded design and functionality expectations.

# Live Demo

# The Hotel Boundary (Real World Project)

- Tech Stack: Leveraged React, React Query, GSAP, Swiper JS, and various design patterns like HOC, HOF, and render props to create a feature-rich web application.
- Design Collaboration: Worked closely with a skilled designer team to create a visually appealing and userfriendly interface.
- Strapi Integration: Utilized Strapi, a backend CMS API, to efficiently manage and serve content to the application.
- Real-World Functionality: The project incorporated real-world mail support, enabling seamless communication for users.
- Online Booking: Implemented online booking functionality, providing users with a convenient way to schedule appointments.
